SUMMARY

Full Stack Developer specializing in React.js, Node.js, Express.js, MongoDB, and FastAPI with hands-on experience building MERN applications and AI-powered solutions. Skilled in building REST APIs, implementing JWT authentication, integrating LLMs, and deploying cloud-based applications. Strong foundation in Data Structures & Algorithms, Object-Oriented Programming, and database design.

EDUCATION

Parul University, Vadodara, Gujarat

B.Tech in Computer Science & Engineering (Artificial Intelligence)

CGPA: 7.76/10 | Expected Graduation: 2027

PROJECTS

TaskHub – Task Management System | *React.js, Node.js, Express.js, MongoDB, JWT* | [Live Demo](#)

- Developed a MERN stack task management application with JWT authentication, protected routes, and profile management.
- Built RESTful APIs using Express.js and MongoDB for CRUD operations, filtering, search, sorting, and pagination.
- Implemented Kanban board, calendar, task tracking, and a responsive React.js UI using Context API.
- Deployed the application on Netlify, Railway, and MongoDB Atlas for scalable cloud-based hosting.

TalentSync AI – AI Recruitment Platform | *FastAPI, MongoDB, LLM, Vector Embeddings* | [GitHub](#) [Currently Developing]

- Developing an AI recruitment platform for resume analysis and semantic candidate-job matching
- Building FastAPI backend services for resume parsing, candidate evaluation, and recruiter workflow management.
- Implementing vector embeddings for semantic candidate-job matching and relevance scoring.
- Designing MongoDB data models for candidate profiles, job postings, and recommendation workflows.
- Integrating LLM-powered messaging to automate recruiter outreach and candidate communication.

Neural Spark – AI-Powered E-Learning Platform | **Group Project** | [Live Demo](#)

- Developed an AI-powered e-learning platform with automated grading.
- Developed an assignment evaluation pipeline using Transformers and prompt-engineered LLMs.
- Integrated frontend, backend, and database components for seamless data flow.
- Deployed the application on cloud platforms for testing and remote access.

TECHNICAL SKILLS

- **Languages:** Java, JavaScript, Python, C
- **Frontend:** React.js, HTML5, CSS3, Tailwind CSS
- **Backend:** Node.js, Express.js, FastAPI, REST APIs, JWT Authentication
- **AI & LLM:** Prompt Engineering, LLM Integration, AI Workflow Automation
- **Databases:** MongoDB, MySQL
- **Tools & Platforms:** GitHub, Postman, VS Code, Netlify, Railway, MongoDB Atlas
- **Core Concepts:** Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), DBMS

ACHIEVEMENTS & CERTIFICATIONS

- Solved 200+ coding problems on LeetCode.
- IBM AI Foundations
- Hacker Rank Software Engineer
- NPTEL Computer Networks Certificate (IIT Kharagpur)
